November 30, 1999

CAPT Michael H. Mittelman
Commanding Officer, NOSTRA
Building 1794, Weapons Station
Yorktown, VA 23691

Subject: **Status of Year 2000 readiness for VisionStar Financial Management System.
VIStar (Prism) Financial Management System (FMS) and ViStar Lab Management
System (LMS)**

Dear CAPT Mittelman:

Release 2.0 of ViStar Lab Management System (LMS) and release 2.0 of ViStar Financial Management
System (FMS) are installed and running at NOSTRA. Release 2.0 of both ViStar LMS and ViStar FMS
are Year 2000 ready. Year 2000 readiness includes the software platform utilized with the applications.
The technology platform consists of Oracle Forms 3.0, the Oracle Database, release 7.3 and Unify Accell.

VisionStar has expanded the date fields in the Oracle database to accommodate four digit years.
VisionStar has completed testing of the Year 2000 ready ViStar LMS and ViStar FMS. During the
testing we found no errors or problems related to the use of dates subsequent to December 31, 1999.
Multiple dates after January 1, 2000 were tested including February 29, 2000.

Other customers have tested the Year 2000 readiness of the ViStar software release that is installed at
NOSTRA. This software was then installed and is operating at these customers. No date related issues
have been reported.

The H-P Unix operating system Version 10.3 that is installed at NOSTRA has had all the available Year
2000 patches applied and Hewlett Packard certifies the operating system as Year 2000 ready. If Hewlett
Packard requires any additional patches prior to January 1, 2000 that are related to Year 2000 readiness,
we will work with NOSTRA to install these changes.

If you have any questions please contact me at (503) 731-9715.

Sincerely yours.

David Greer
CEO
